# ENVIRONMENTAL STUDIES AS

The issues facing the environment, such as deforestation, species extinction, air and water pollution, and climate change, are complex and challenging. An education in Environmental Studies provides students with an understanding of the Earth's living and physical environment, the processes that maintain life on our planet, and the human impact on the environment. Students acquire the laboratory and analytical skills to study and solve concerns related to the local and global environments in which we live.

Environmental Scientists and Specialists

2021 Median Salary

\$76,530/yr

United States Department of Labor

## Why Cayuga?

- Students obtain an understanding of basic physical and biological principles that govern natural processes
- Students learn the socioeconomic and political influences that shape our perceptions of nature and environmental issues
- Students gain an understanding of the interactions and complexities of environmental problems
  - Hands-on training in GIS technology, global positioning systems, and remote sensing using state-of-the-art GIS facilities
    - Transfer into a related four-year program at a variety of universities, including SUNY ESF and SUNY Brockport
